

Drylands Learning and
Capacity Building Initiative
for Improved Policy and
Practice in the Horn of Africa

30 November 2013

Dear Sir/ Madam,

Please find the enclosed posters that have been jointly produced by REGLAP and the NDMA. The posters show the key recommendations from a series of studies that REGLAP conducted in 2013. These are:

1. Report on the place of crop agriculture in the drylands: an opportunity or a threat?

Michael Mortimore, June 2013¹

2. Opportunities to promote integrated planning in the drylands of the Horn of Africa,

Fiona Flintan, February 2013²

3. Report on good practices in water development for drylands regions, Sobona Mtisi and Allun Nichol, December 2013³ and the good practice principles for water development, REGLAP Water Learning Group, March 2013⁴

Please display these posters in a prominent area and encourage discussion on the issues raised. Please also refer interested people to the relevant documents for more information.

If you do not able to display these posters for whatever reason please pass them on to someone who might.
