PROTECTION, REGISTRATION & MANAGEMENT OF COMMUNITY LAND

- Ensure registration of community land does not restrict productive mobility of pastoralists or access to strategic grazing areas and resources.

- Ensure that inter-community reciprocal rangeland resource agreements are preserved to enhance livestock and rangeland productivity.

- Plan with neighbouring communities measures to improve rangeland health e.g. bush clearing, seasonal access etc.

- Ensure the community assembly includes current residents and users of land including vulnerable and marginalized groups.

- Ensure that all critical decisions are properly discussed, understood and agreed to by at least 65% of the Community Assembly.

- Elect to the Community Land Management Committee people who will protect community interests for the good of all and future generations.
